Flint Hills Economic Development District

FLINT HILLS **REGION** 

The Flint Hills Economic Development District is **our region's most valuable designation**.

Economic Development District Designation = <u>Access to Millions</u> of Dollars to Support Our Region

Flint Hills Regional Council's **coordinator role** to oversee the implementation of the CEDS is critical to the region, and no other entity is positioned to assist in this way for the sevencounty area.

FLINT HILLS **REGION** 

# Achieved through a locally-based, regionally-driven economic development planning process

#### EDA's Description:

Economic development planning – as implemented through the CEDS – is not only a cornerstone of the U.S. Economic Development Administration's (EDA) programs, but successfully serves as a means to:

- Engage community leaders
- Leverage the involvement of the private sector
- Establish a strategic blueprint for regional collaboration
- Provides the capacity-building¹ foundation by which the public sector, working in conjunction with other economic stakeholders (individuals, firms, industries), creates the environment for regional economic prosperity

A Strategy-Driven Plan for Regional Economic Development

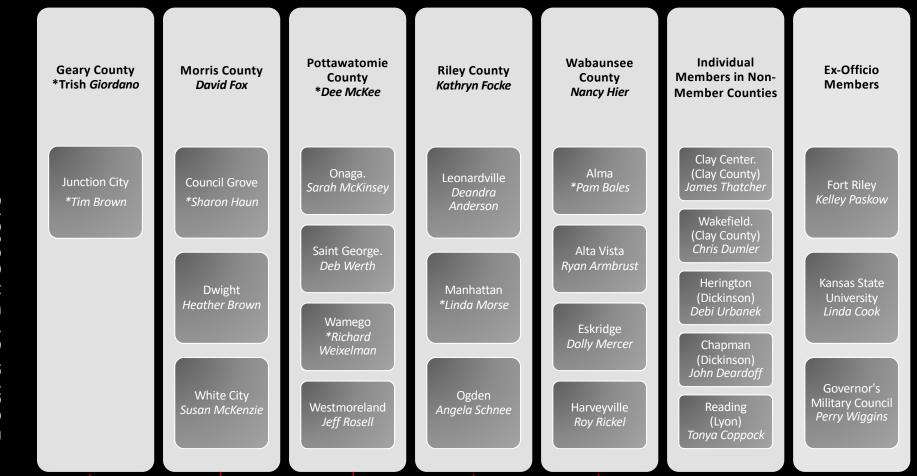

# Why is the Flint Hills Regional Plan Critical for Our Region?

#### Serves as prerequisite for Economic Development District designation by EDA

- Provides a vehicle for individuals, organizations, local governments, institutes of learning, and private industry to engage in a meaningful conversation and debate about what capacity building efforts would best serve economic development in the region
- Creates opportunity for private-public partnerships
- Takes into account and, where appropriate, integrates or leverages other regional planning efforts
- Leverages use of other available federal funds, private sector resources, and state support to advance a region's CEDS goals and objectives
- Regions must update their CEDS at least every five years to qualify for EDA assistance under its Public Works and Economic Adjustment Assistance programs.

### Build Back Better Regional Challenge

Designed to assist communities nationwide in their efforts to build back better by accelerating the economic recovery from the coronavirus pandemic and building local economies that will be resilient to future economic shocks.

**PHASE** 

**Concept Proposal** 

PHASE

**Project Implementation** 

Phase I application will focus on projects to establish a regional talent pipeline, centering on healthcare, and incorporating other areas such as IT, biosecurity/life sciences, etc. This application would be in partnership with the technical education and higher education institutions throughout the region (as desired), aiming to address the critical talent shortages in these areas, while working to create a system to help retain workers to our region.
