

**Questions and Responses Environmental
RFQP 7.17.26**

1. We understand the work scope per the RFQ currently includes application and implementation of a Community-Wide Assessment (CWA) Grant. The assessment type of grant includes a standard CWA and Brownfield Coalition Assessment Grant. Can you clarify which type of assessment grant is being pursued?

Response: FHRC will initially apply for an **EPA Brownfields Assessment Coalition Grant** for the FY 2027 funding cycle.

2. Can you clarify page limits for Sections 3,5, and 6

Response:

- **Section 3 Project Team:** Resumes for the Project Manager and Key personnel are limited to two pages for each person. Limit to 10 resumes.
- **Section 5:** Relevant Experience and References. Maximum 10 pages.
- **Section 6:** Cost Proposal. Maximum 5 pages.

3. Is the proposed contract for assistance with application/procurement and implementation of just this assessment (CWA or Coalition Assessment grant), or is this a comprehensive contract that may include assistance with additional grants and brownfield services as applicable provided a market survey conducted by FHRC indicates that the prices the contractor proposes are reasonable?

Response: This will be a comprehensive five-year contract to include assistance with additional grants, brownfield and professional services (EPA grants, federal and state funding opportunities) and related brownfield services, as needed. FHRC will conduct and document a market analysis or other appropriate price analysis to determine that the proposed fees are fair and reasonable and consistent with applicable federal requirements.
